I believe my campus is diverse.... "Yes"	Code
I see a mix of ethnic and social groups on campus every day. [Name] does have a long way to go to become a very diverse institution, however.	Race/Ethn. Group/Act. Needs Improv.
Any group of people of varying backgrounds create diversity.	Backgrounds
But only to a certain extent--the campus represents a lot of people, but not so much politically, and the population is mostly white.	Needs improvement Race/Ethnicity
It depends on what type of diversity you are talking about. If it is racial diversity you are talking about I think we are in the middle. Compared to a Japanese university, for example, we are extremely diverse. Compared to some other universities in the US, we are not. However we do have many other types of diversity on campus (family backgrounds, religious beliefs, ect) that cannot be measured as easily.	Race/Ethnicity Backgrounds
I'm able to go anywhere on campus to find some new activity that I hadn't considered before.	Groups/Activities
there are many different cultural clubs that offer activities for all sorts of people. There is not a small amount of people from each ethnicity, there are large amounts and they are proud of who they are.	Groups/Activities Race/Ethnicity

Green: Race/ethnicity

Pink: Groups/activities

Teal: Needs improvement

Yellow: Backgrounds
